Trust Grows Through Action: A Disciplined Path to U.S.-Japan Industrial Cooperation

Senior Vice President, ELLWOOD Group, Inc.
Director, American Shipbuilding Suppliers Association

Dana A. Beyeler

This presentation outlines a disciplined framework for U.S.-Japan shipbuilding cooperation, grounded in a beginner's mindset and craftsmanship discipline—where trust is built through measurable action. Japanese firms may secure U.S. opportunity by solving specific bottlenecks, aligning documentation, and demonstrating reliability. "Guard-Rails" and illustrative potential joint actions show how cooperation may be explored carefully, reducing risk, improving readiness, and strengthening both industrial bases.

Women's Empowerment Panel in the Maritime Industry: International Collaboration among Maritime Clusters in the Era of Global Connectivity

Organizer | Star Marine Public Relations

Venue | Event Stage, West Hall 2

Description | Against the backdrop of increasingly interconnected global maritime clusters, this session will examine the promotion of women's participation in the maritime industry from the perspectives of female leaders actively engaged in international collaboration. Discussions will focus on human resources policies and organizational development within companies and institutions, strategies for attracting and retaining women in technical fields, and leading-edge examples of women's empowerment initiatives at shipping companies. The session will also explore the background, role, and global activities of WISTA JAPAN, an international women's network in the maritime sector, and consider how diversity can enhance the overall competitiveness of the maritime industry.
